PROPOSAL FOR INTERNATIONAL, BILINGUAL AND PRIVATE KINDERGARTENS & SCHOOLS 2026

A special Slovenian farm experience through animals, nature, languages, technology and robotics.

Children experience Slovenia in an authentic way - through contact with animals, forest and meadows, hay, movement, observation, cooperation and real farm life. The programme encourages curiosity, independence, teamwork and learning with all senses in a safe, warm and inspiring environment.

Farm visits are possible in all seasons.

animals • nature • languages • technology • authentic experiences

N

NATURE

We explore the forest, meadows, trees and seasonal changes.

A

ANIMALS

We care for animals, observe them and learn through respectful contact.

L

LANGUAGES

Activities can include Slovenian, English and bilingual elements.

T

TECHNOLOGY

We create, build, investigate and learn with robotics.

PROGRAMME CONTENT

Ready-made modules or a tailor-made visit for your group

Our visits combine authentic farm life with purposeful learning. Each activity is adapted to the age, language level and learning goals of the group. Children learn by touching, observing, building, moving, asking questions and presenting their discoveries.

A Farm Animals & Empathy

Meet horses, ponies, goats, sheep, geese, chickens and dogs. Children learn how animals communicate, what they need and how to approach them respectfully.

N Nature, Forest & Seasons

Explore meadows, trees, leaves, soil, tracks, flowers and the rhythm of the farm through seasonal observation and simple field tasks.

L Languages & Local Culture

The programme can support English, Slovenian or bilingual learning. Children learn useful farm vocabulary through games, storytelling and real situations.

R Robotics & Creative STEM

LEGO Education activities connect technology with the farm theme: building models, mechanisms, sensors, coding and problem-solving challenges.

H Hands-on Farm Skills

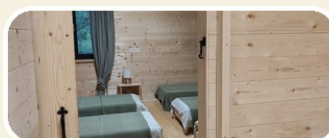

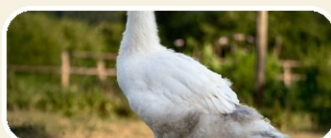

Depending on the season: preparing simple dough, collecting natural materials, hay and garden tasks, animal feeding routines and safe tool use.

M Movement & Team Challenges

Guided games in nature help children develop cooperation, orientation, confidence, communication and healthy outdoor habits.

Example 3-hour visit

- 1 **Welcome circle** arrival, safety and group agreements
- 2 **Farm discovery** animals, nature walk and observation task
- 3 **Creative workshop** robotics, language game or seasonal craft
- 4 **Reflection** sharing, photos and goodbye circle

POD KOSTANJI
